

St John's Primary School Euroa

Sun Protection Policy

This policy follows the authority provided in Australian National Standards for Sunscreen products, Eye and Face Protection; Playground equipment and surfacing and Sun Protective Clothing; and was written in consultation with Cancer Council Victoria.

The Hazard - Sun Exposure

Too much exposure to ultraviolet (UV) radiation from the sun causes sunburn, skin damage and increases the risk of skin cancer. Sun exposure during childhood and adolescence contributes significantly to the lifetime risk of developing skin cancer. Australia has one of the highest rates of skin cancer in the world. Skin cancers account for 80% of all new cancers diagnosed in Australia each year. Melanoma is the most common cancer diagnosed for 15 – 29 year olds.

St John's School's Policy

St John's School Euroa is committed to providing a safe working environment for all our students, workers and visitors.

It is our policy to:

- increase student and community awareness about skin cancer and sun protection
- encourage and require the entire School community to use a combination of sun protection measures when UV levels are 3 and above
- work towards a safe school environment that provides shade for students, staff and the School community
- assist students to be responsible for their own sun protection
- ensure that families and new staff are informed of this policy
- support student duty of care requirements
- support appropriate workplace safety strategies to minimise UV risk and associated harms for staff and visitors.

Sun Protection Strategies

St John's School Euroa has developed the following sun protection strategies:

General

- Staff and or students check the daily local sun protection times. This is added to our school homepage (i.e. SunSmart widget). The sun protection times are a forecast from the Bureau of Meteorology for the time of day that UV levels are forecast to reach three or above. At these levels, sun protection is recommended for all skin types.
- All students and staff use a combination of sun protection measures throughout the day whenever UV levels are three or above to ensure they are well protected at the appropriate times.
- UV levels are typically 3 and above from mid-August to the end of April.
- Active outdoor play is encouraged throughout the day all year, provided appropriate sun protection measures are used when UV is 3 and above.

St John's is a Child Safe School where all children are respected and protected from harm.

Shade

- The School makes sure there is sufficient shelter and trees providing shade in the school grounds particularly in areas where students congregate (e.g. lunch areas, canteen, outdoor lesson areas and popular play areas).
- Shade provision is considered in plans for future buildings and grounds.
- Playgrounds should be designed with areas of effective summer shade from either trees or built elements, or both. Playgrounds which comply with Australian Standard AS 4685.0:2017, Playground equipment and surfacing - Development, installation, inspection, maintenance and operation, are encouraged but optional. Refer to Supervision & Inspection - Playground.
- The availability of shade is considered when planning excursions and outdoor activities.
- Students are actively encouraged to use available areas of shade when outside. Students who do not have appropriate hats or outdoor clothing are asked to stay in an area protected from the sun.

Hats

- Students and staff are required to wear hats that protect their face, neck and ears whenever they are outside.
- Recommended sun-safe hats include legionnaire, broad-brimmed and bucket hats with a deep crown and angled brim. Baseball caps do not offer enough protection and are not recommended.
- Students who do not have an appropriate sun protective hat will be asked to stay in shaded areas only.

Sunscreen

- The School supplies SPF30 (or higher) broad-spectrum, water-resistant sunscreen for staff and student's use. Sunscreen is stored in the sickbay, First Aid bag's and classrooms.
- Sunscreen is applied in accordance with the manufacturer's directions, and at least 20 minutes before going outdoors.
- Sunscreen should be reapplied at least every two hours, and more frequently when participating in sport, sweating or swimming, and after towel drying.
- Time will be allocated for sunscreen application prior to outdoor activities.
- Strategies are in place to remind students to apply sunscreen before going outdoors (e.g. reminder notices, sunscreen monitors, sunscreen buddies).

Sunglasses

- Close-fitting wrap-around sunglasses that comply with Australian Standards AS/NZS 1067.1 2016, Eye and face protection - Sunglasses and fashion spectacles, Part 1: Requirements (Sunglasses: lens category 2, 3 or 4) and cover as much of the eye area as possible are encouraged but optional.

Role Modelling

- Staff act as role models by using a combination of sun protection measures as outlined above when the UV level is 3 or above.
- Families and visitors are also encouraged to use a combination of sun protection measures (sun protective clothing and hats, sunglasses and sunscreen) when participating in and attending outdoor school activities.

Curriculum

- Sun protection and skin cancer awareness programs are incorporated into appropriate areas of the school curriculum, including use of clothing and sunscreen, prevention education, websites, etc.
- Students are encouraged to be involved in initiatives to promote and model sun protection measures to the whole School community.
- Sun safe behaviour is regularly reinforced and promoted to the whole school community through newsletters, School public website, parent meetings, staff meetings, School assemblies, student and teacher activities and on student enrolment.

Uniform

- Sun protective clothing is included in the School uniform/dress code and sports uniform. This includes clothing with:
- elbow length sleeves
- shirts and tops that cover shoulders, with a collar that sits close to the neck, above the collarbone
- appropriate hats
- appropriate gloves and other accessories (where required for the activity)
- appropriate sunglasses (optional)
- other appropriate sun protective clothing.
- Sun protective clothing with a UPF rating, in compliance with Australian Standard AS/NZS 4399:2017, Sun protective clothing – Evaluation and classification, is encouraged but optional.

Scheduling and Planning

Sun protection is considered when planning all outdoor events (e.g. assemblies, camps, excursions and sporting events).

Before commencing an excursion, the organising staff will check the daily local sun protection times of the location, and continue to monitor for the duration of the excursion.

Workers' Responsibility – WH&S

Under WH&S requirements, all workers must follow the guidelines as set out in this policy to reduce their risk of occupational skin damage.

Implementation

This policy is implemented through a combination of:

- staff and student training and awareness of issues relating to skin and safe sun exposure
- implementation of sun protection measures
- effective notification procedures
- effective communication procedures
- effective record keeping procedures
- initiation of corrective actions where necessary.

Teacher Professional Learning

- Teachers are encouraged to complete Cancer Council's free Generation SunSmart online teacher PL modules and any other modules assigned my St John's School.

St John's School Euroa is committed to the continuous review and improvement of all its operations, including this policy.

It is the responsibility of the Principal to regularly monitor and review the effectiveness of the Sun Protection Policy to ensure it is working in practice and revise the policy when required.

Next Review Date: June 2023
